

# 32<sup>nd</sup> Annual Conference of the International Society for Environmental Epidemiology

Advancing Environmental Health in a Changing World

**ISEE  
2020**  
August 24-27, 2020

## Yaguang Wei

**Harvard University, Environmental Epidemiology, United States**

Yaguang Wei is a PhD Candidate in Environmental Epidemiology at Harvard University, advised by Dr. Joel Schwartz. His research mainly focuses on epidemiological and computational methods for identifying health effects of air pollutants and climate change. He has recently begun work looking at effects of air pollution measurement error on health effect estimates.
